

STAINLESS STEEL KEYPADS

APEM stainless steel keypads and keyboards combine the highest level of resistance to vandalism (up to IK10) with an attractive design.

Resistant to harsh environments, they are waterproof and withstand most corrosive agents.

DISTINCTIVE FEATURES

- **Uniform backlighting, no visual fatigue**
- **Compact format:** flush version, with or without front face
- **Customized design:** backlighting color, logo shape and placement
- **Extreme robustness:** marking protected with a wear-resistant resin

- **Competitive pricing**
